# ABOUT US

## REJS AS A MANUFACTURER

Rejs is one of the leading manufacturers of furniture accessories in Europe. We specialize in the production of wire, steel and aluminum fittings for modern kitchens, bathrooms and wardrobes. The founder and owner is Jan Rejs who, together with his sons, has been implementing the company's strategy continuously since 1993.

Currently, the company employs 700 employees, three modern production plants operate within the REJS group, a modern research and development center, central warehouse and tool shop. Thanks to our own paint shops, electroplating plants and carpentry centers, REJS can provide comprehensive customer service at each stage of implementation.

Our goal is excellence - both in quality and professional customer service. That is why we take great care of our own-distribution network, guaranteeing price competitiveness, deliveries in a short time, as well as friendly and professional help of advisers.

- principle production activities are **furniture elements**
- the main raw materials for production are **steel, wire and aluminum**
- production process based on the **latest technologies**
- **highly qualified design engineers**, programming and quality control
- **research and development department**
- **Protech** provides services in the field of applying decorative coatings to metals, it is one of the **largest and most modern electroplating companies in Poland**
- **Alus** - a modern aluminum and glass processing plant

**3 production facilities**

**central warehouse**

**modern toolshop**

**Research & Development Department**

# KITCHEN

## *Let's start with the kitchen ...*

The kitchen is the place where the heart of every home beats. Lazy breakfasts, family dinners, romantic suppers. A meeting place for all household members. In order to fully enjoy it's comfort, it is worth thinking about how the space should be arranged, at the beginning of the designing stage. Thanks to the spacious drawers and cargo baskets, we will have convenient access to all stored products - even those at the back and below.

### *One kitchen, many possibilities*

REJS systems consist of several product lines. The **Variant MULTI line** is packed with solutions and even more product configuration options. The user chooses the type of running system and the version of wire baskets, enabling the creation of an ideally tailored product to be created, suiting the needs and characteristics of a given place in the kitchen, as well as the size of the wallet.

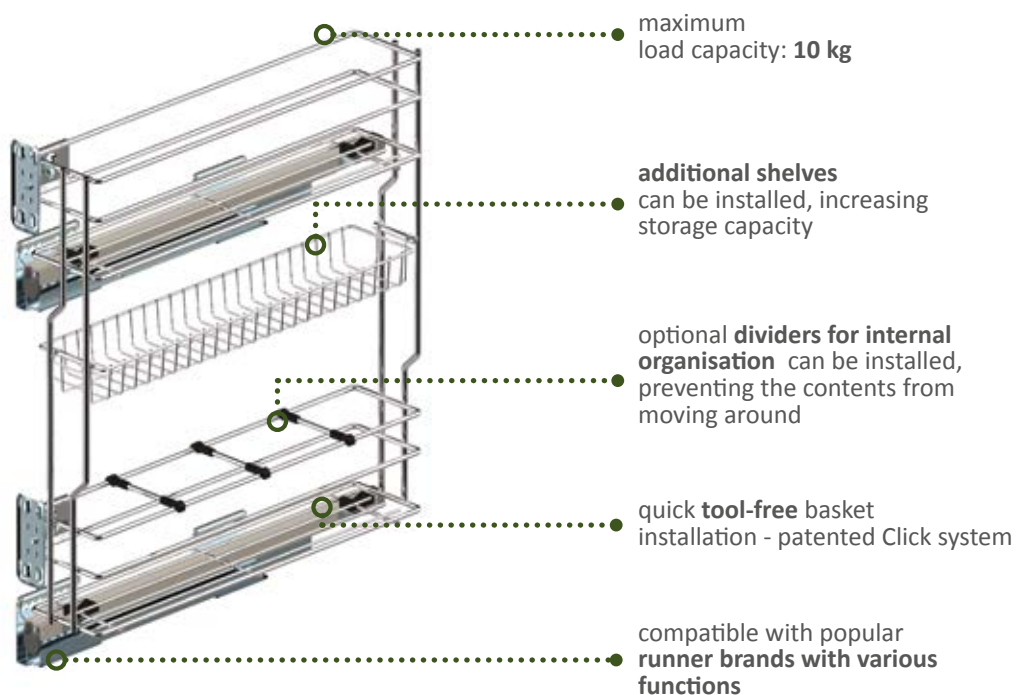

The **Maxima line** is a system designed for a demanding user, it includes 4 styles of baskets: Puro, Silva, Evo and Classic. The heart of the systems for lower and tall cabinets are durable frames and extension systems, guaranteeing smooth and comfortable movement during thousands of opening and closing cycles.

The **Maxima Puro line** is the latest offer from REJS, available in two color versions: black with wooden decor and white - with glass. The full shelves of the system are made from high steel quality. The **Maxima Silva line** is characterized by shelves made of laminated board and chrome are wire, **Maxima Evo** is in turn a combination of chrome wire and plastic trays which can be detached and easy to clean. In the **Maxima Classic** version, the cargo baskets are fully made from chrome wire. You can store cutlery, pots and dry food on them - like flour or sugar, as they ensure good air circulation.

The kitchen accessories offer is complemented by: one and two-tier drainers and railing systems, which can be a practical and decorative elements of the kitchen at the same time.

# WASTE SEGREGATION

## *Sort it your way*

The key to comfort when segregating waste at home is trouble-free and quick access to all baskets at once, as well as being able to adjust the system to fit the users unique lifestyle, habits, and kitchen layout. To this end, Rejs has developed a range of waste segregation systems that will ensure everyone can find something that fits their needs.

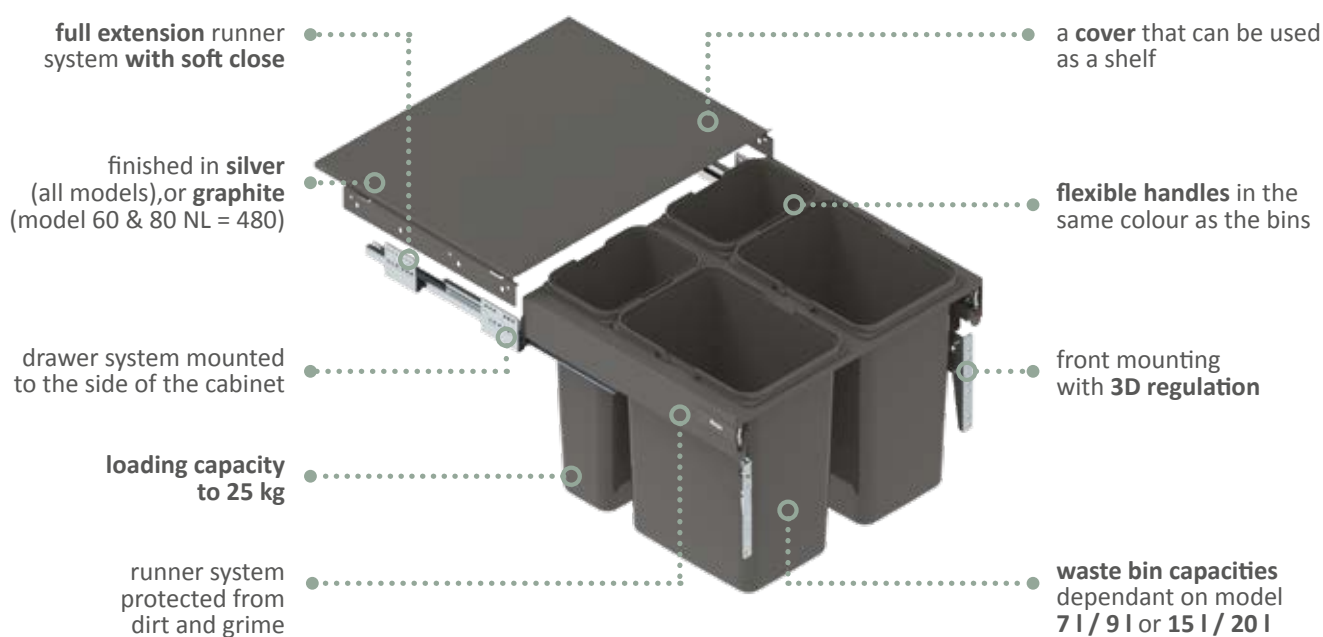

### *Living in harmony with the environment has never been so easy!*

**Segrego** is a functional and easy-to-use drawer system with incorporated waste bins, which can be fully withdrawn from the cabinet, enabling simple and convenient waste segregation. The **JC** line's integrated extension system and bin rack, enables mounting to cabinets with standard hinged fronts, as well as the option to mount the front directly to the **JC** frame itself (via a separately sold front mounting). The **Variant Multi** line waste system can also, like the **JC** system, be fitted to cabinets with extending, or traditional hinged fronts. It all depends on which extension system is chosen. The Rejs range of waste segregation systems also includes the lines **Praktiko** and **Sorte**, which fit directly to an existing drawer system. **Praktiko**, consists of a set of waste bins, which fit to a moulded plastic tray which is laid in the draw bottom. Alternatively the **Sorte** system enables these same bins to be fitted to a metal frame, which mounts to the drawer sides themselves. With each of these systems the frames can be chosen to accommodate the specific needs of the user. These solutions work best where the focus is on functionality.

Most Rejs segregation systems can be fitted with an electrical opening mechanism. Developed by German specialists, the **Hailo Libero 3.0** can be mounted in any drawer. To open it, just move your foot near the sensor located in the bottom panel. Alternatively, we offer the **Servo-Drive Uno** system developed by Blum. This system enables the drawer to be opened by pressing the front with your hand or knee.

*To open the drawer simply place  
your foot in the area  
of the front sensor.*

The **Hailo Livero 3.0** is the latest electric, drawer opening system developed by German Specialists. It does not require a special cabinet, it can be mounted to the bottom of any drawer. Thanks to this system a heavily loaded drawer can be easily opened by moving the foot near the sensor located in the bottom panel. The device can be connected via wi-fi using a phone or computer. The system has an integrated light, the intensity of which, as well as the speed of the drawer extension, and sensitivity of the sensor, can be adjusted to the needs of the user.

*To open the drawer simply  
press your hand or knee  
against its front.*

Thanks to the **Servo-Drive Uno** from Blum, opening and closing drawers can be accomplished by simply applying pressure to the drawer front using a hand or knee. Using this system helps to keep drawer fronts clean, and at the same time the user benefits from the systems soft closing mechanism.

In order to mount the Servo-Drive Uno, a separate frame is needed. This can be purchased separately.

## Hailo Libero 3.0

### 1 Drive Unit Hailo Libero 3.0

- designed for waste systems Segrego, Sorte, Praktiko
- adjustable drive force, sensor sensitivity, and lighting intensity

# DRAWER SYSTEMS

and runners

## *Everything in its own place*

From internal wardrobe drawers to large kitchen appliance drawers, Rejs drawer systems can be adapted to fit the needs of the user in a variety of spaces and functions.

### *All products at your fingertips*

Unlike traditional shelves, drawer systems make full use of available space, and grant easier access to, amongst other things, tableware, cosmetics, detergents, documents, and clothes – everything stored within easy reach and sight. By utilising internal organisation systems, such as dividers, rails, and inserts (metal, plastic, and wood), order can be maintained even amongst the smallest items. The use of the highest quality soft-close runner systems guarantees smooth movement and discreet closing.

REJS offers several drawer systems that differ in both appearance and function. The Maxima Puro line of internal drawer systems is our newest line. Maxima Puro is made of the highest quality stainless steel, and available in two colours: black with wooden decor and white with glass. The Slim Box and Comfort Box systems, already well known on the market, are available as both drawers with fronts, and internal drawers. They are available in several colours: Slim Box, in white, graphite and the new black finish, and Comfort Box, in white and silver.

# INTERNAL ORGANISATION SYSTEMS FOR DRAWERS

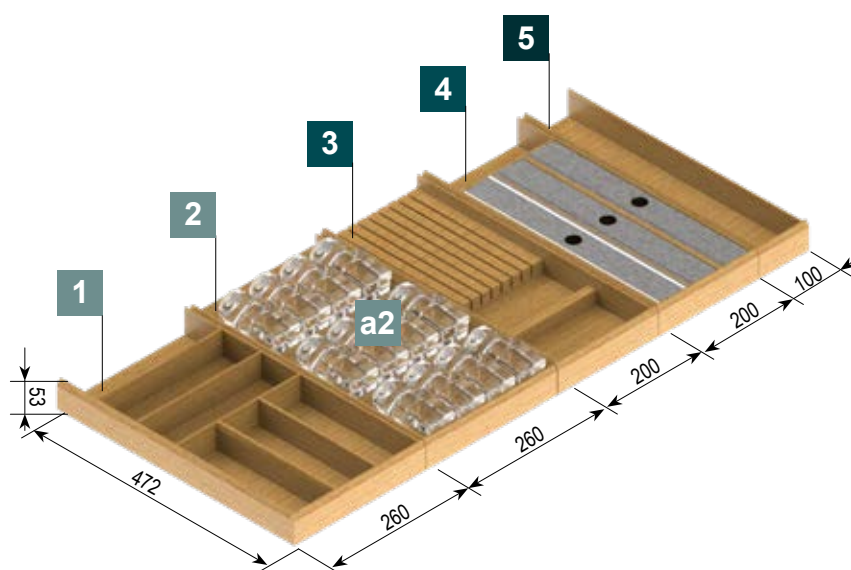

### Wooden inserts

- for drawers 500 mm deep
- compatible with Slim Box front and Blum Legrabox
- can be used with other drawer systems, e.g. Comfort Box (perfect fit not guaranteed)
- 5 types of inserts designed to store specific products
- sold individually enabling tailored layout
- if the chosen layout necessitates space between inserts we recommend using our anti-slip mat (p.126)

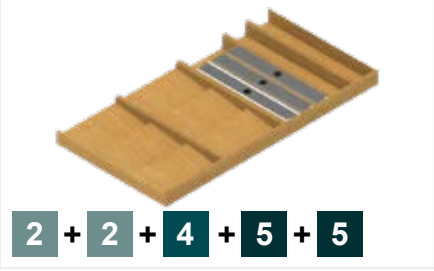

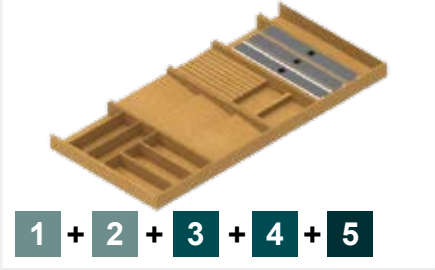

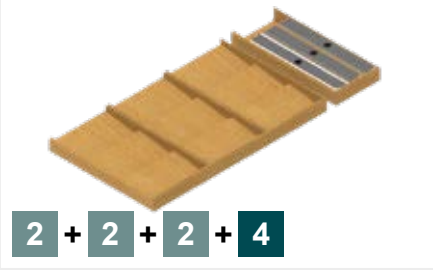

### Basic Components

**1 + 2 + 3 + 4 + 5**

Example configuration of a set of wooden inserts for a drawer with a width of 1100 mm

Examples of possible layouts  
with various drawer widths:

600	 <b>1 + 1</b>	 <b>2 + 2</b>	 <b>3 + 4 + 5</b>
700	 <b>1 + 1 + 5</b>	 <b>2 + 3 + 5</b>	 <b>2 + 4 + 5</b>
800	 <b>1 + 1 + 3</b>	 <b>1 + 3 + 4</b>	 <b>1 + 3 + 3</b>
900	 <b>1 + 1 + 3 + 5</b>	 <b>2 + 2 + 4 + 5</b>	 <b>1 + 2 + 4</b>
1000	 <b>1 + 1 + 3 + 4</b>	 <b>2 + 2 + 4 + 5 + 5</b>	 <b>1 + 2 + 3 + 4</b>
1100	 <b>1 + 2 + 3 + 4 + 5</b>	 <b>1 + 1 + 1 + 3</b>	 <b>2 + 2 + 2 + 4</b>

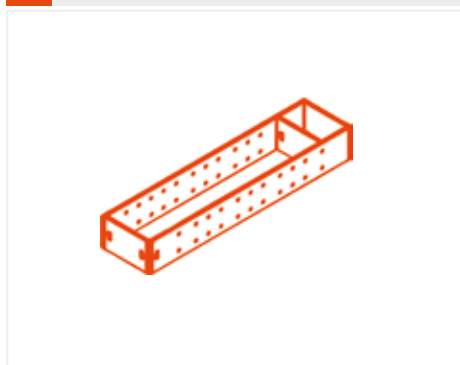

### Metal frames

- for Slim Box drawers with depths 450, 500 and 550 mm
- available in 3 widths and 3 lengths
- sold individually enabling tailored configuration
- one divider included, possible to add more dividers
- can accommodate our metal containers (p. 124)
- we recommend using a non-slip mat (p. 126)
- can be used in high drawers with the use of the height booster (p. 128)

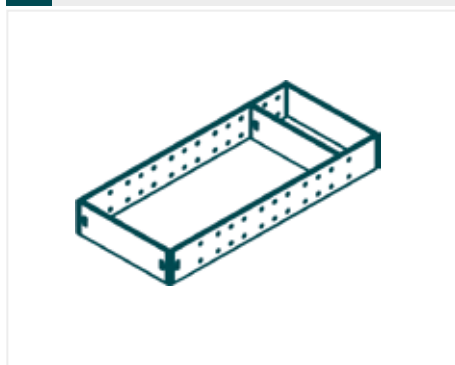

### Basic Components

# THE DRESSING ROOM

## *Solutions made-to-measure*

Create the wardrobe of your dreams thanks to the wide range of accessories from REJS. Functional drawer systems for underwear, pull out shelves for boots, hanger systems for dresses, jackets, and trousers – all help to keep things neat and tidy for longer. REJS solutions allow for the personalisation of interiors to meet specific needs of the user. The selection includes a wide range of drawers in various dimensions, as well as the organisation systems needed to complete them. The offer also contains a selection of hanger systems, poles, and attachments to complete the wardrobe.

### *Elegance in black or white*

New - The **Maxima Puro** line consists of drawers made of the highest quality steel, available in two colours - elegant black, which is complemented by a wooden decor and timeless white with glass. Robust runner systems with a loading capacity of 40 kg ensures reliable operation for years. REJS organisational systems can be used to help facilitate the neat storage of clothes, shoes, and other small items in these drawers. Elegant organisers for jewelry and accessories, are available in two colours: cream synthetic leather with black velvet and black synthetic leather with a copper finish.

### *Universal lightness*

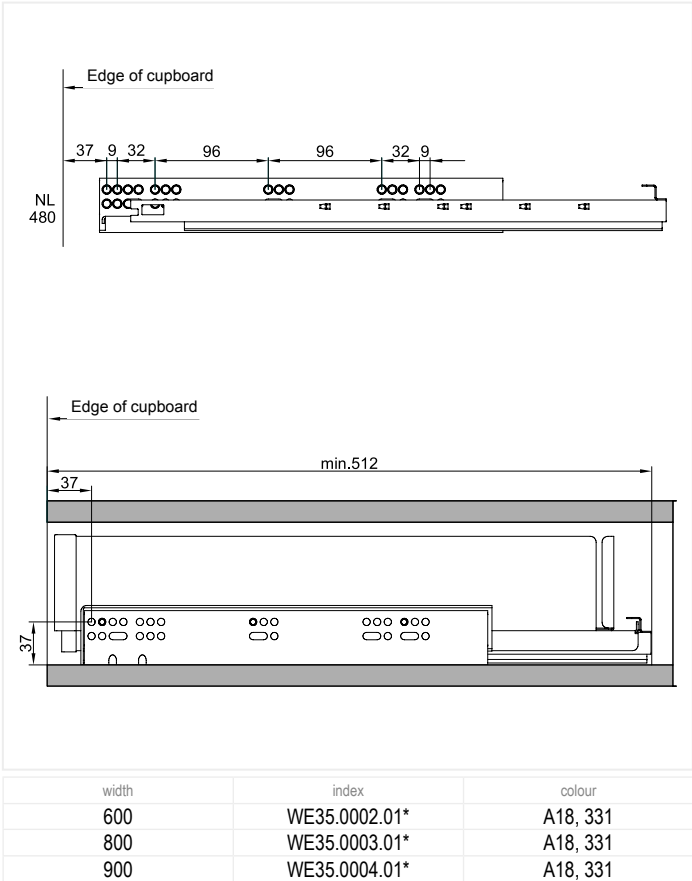

The **Variant Multi** line includes lightweight wire racks and baskets combined with a dedicated REJS driving system offering a maximum load capacity of 35 kg. This line includes storage solutions for underwear, shoes, and trousers. The products are available in white or black.

### *Minimalism and simplicity*

**Simpla** are simple, openwork baskets made of wire, complemented by a choice of two runner systems: roller or ball bearing. Their design facilitates air circulation in the wardrobe. Available in white and silver.

## Slim **Box** drawer and organiser systems

Details on ordering and configuring drawer systems can be found in the *Drawer and runner systems* section.

# BATHROOM

laundry | utility room

## *Functionality and simplicity*

When designing a space, we must not only take care of aesthetics, but also optimal use of the space that surrounds us. REJS accessories provide help with, finding the easiest way to organize space in cabinets and drawers. Regardless of whether we have a small or a spacious bath room.

### *In the fight for every precious centimeter and order in the bathroom*

Cargo systems may turn out to be an ally, which will facilitate the ordering of bathroom storage items. Thanks to the use of this type of systems, we can create perfect organization for towels, cleaning agents and detergents. Depending on your needs, we can adjust types of baskets to the type of products stored, their dimensions and height.

### *Convenient solutions for laundry and utility rooms*

The REJS offer also includes very spacious laundry baskets, which depending on the type of cabinets, can be installed in several ways. Thanks to the available configurations, they can be put in cabinets with a traditional, sliding or tilting front. Perforated containers ensure adequate air circulation, which is very important in the case of dirty textiles.

The Housemaster frame is an ideal solution for small utility rooms. It is designed to store brushes, buckets, cloths, cleaning products and even the vacuum cleaner won't be a hassle. Both in the bathroom, laundry and utility rooms, cargo systems equipped with reliable REJS extension systems, guarantee failure-free and user peace of mind for many years.

# OFFICE

## *A modern work place*

How to create a work space that will favour concentration and creative ideas, simultaneously enabling us to take care of our health? REJS furniture accessories can be relied upon for this task.

### *Comfort and ergonomics*

Regardless of whether the discussion is about furnishing a classic office, conference room, laboratory, a corner for a home office or a children's room, the basis must be appropriately tailored to the needs of the desk user. The Futuro electric frame proposed by REJS, provides height adjustment of the desk top, and thus adaptation to the requirements of the person working and their style of work (sitting or standing).

The REJS offer for offices is complemented by additional accessories - such as a stand for the central computer unit, connectors allowing to connect desks and separate workstations and cable troughs to prevent them from tangling.

# HINGES

and Flap fittings

## *Durability and peace of mind for years*

Hinges and gas stays are often the forgotten components of furniture fittings, although in fact, they are vital in ensuring the functionality of furniture. The durability and quality of these components dictate whether the opening of the cabinet door will be reliable, and consistent over time. Whether the cabinet doors close silently, and softly, or give a loud and irritating crack.

### *Hardware for all uses*

REJS offers three groups of hinges, offering solutions for various tasks and projects. The Expert line is recommended for the most demanding users. These hinges are made of high quality steel with click-on technology, enabling easy assembly and disassembly without the use of tools. The set includes cover plates to conceal hinge cup fixings and hinge adjuster screws. Expert hinges also offer soft-close functionality.

Regular hinges are recommended for standard application, whilst for those who are looking for durable, but economical solutions, the Basic group is recommended.

### Expert hinge

Expert hinges with 35 cup. Aesthetic and functional hinges combined with the SOFT CLOSE function, ensuring gentle and quiet closing of cabinet doors. The eccentric adjustment allows you to set the cabinet door in the right position in one step.

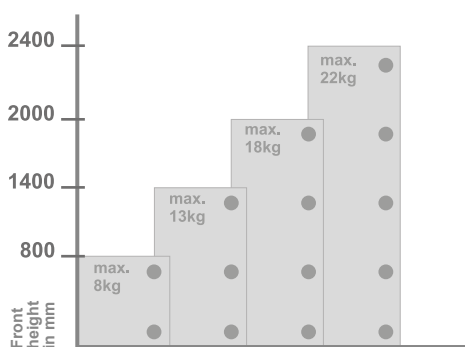

### Mounting of the hinge-arm to the guide.

#### CLICK-ON

Simple assembly and dissassembly without tools by pressing the hinge arm into the guide.

### Hinge quantities

The number of hinges depends on the height and weight of the cabinet front. Stability ensures the greatest possible distance between the hinges. The data refers to cabinet fronts with a width of 600 mm.

## High quality

- tested according to standards PN-EN 15570:2010 to 80.000 Cycles
- covered by a lifetime warranty

## Aesthetic performance

- Signed with the REJS logo
- Cover plate for hinge-arm and hinge-cup included (except the wide-angle hinge)

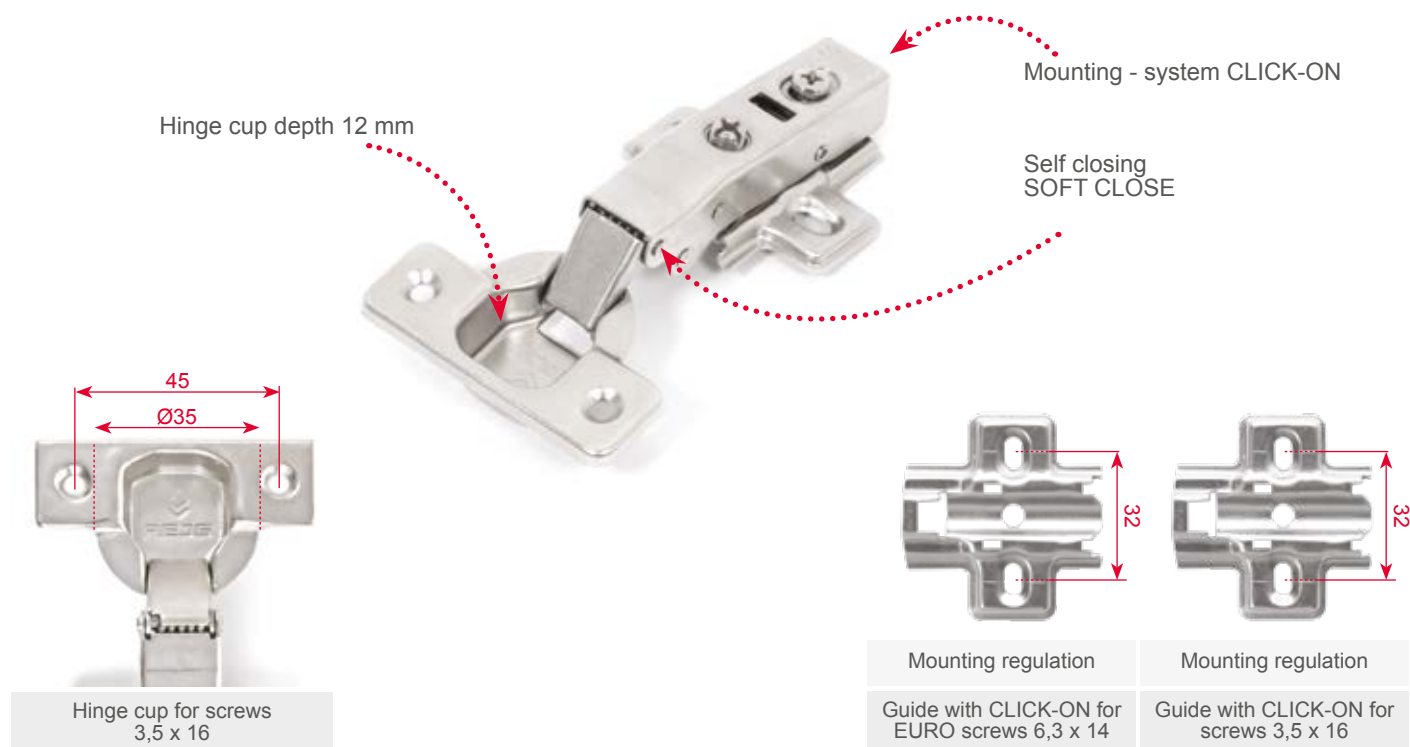

## Packing

- Packed in pairs in printed bags
- Set includes: hinge, guide, coverplates and screws

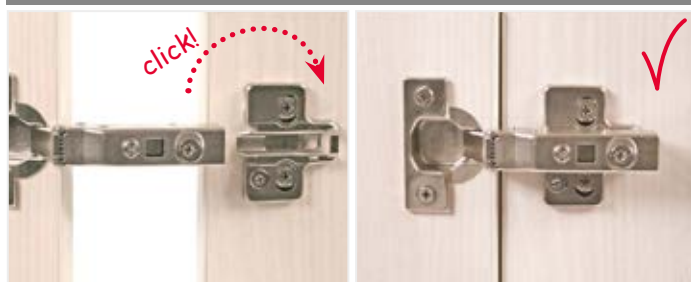

### Regular hinge

Regular hinges with a cup Ø35. Aesthetic and functional hinges with SOFT CLOSE, ensuring gentle and silent closing of cabinet doors.

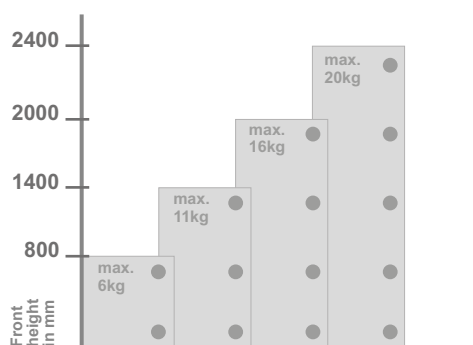

### Mounting of the hinge-arm to the guide.

#### CLICK-ON

Simple assembly and dissassembly without tools by pressing the hinge arm into the guide.

### Hinge quantities

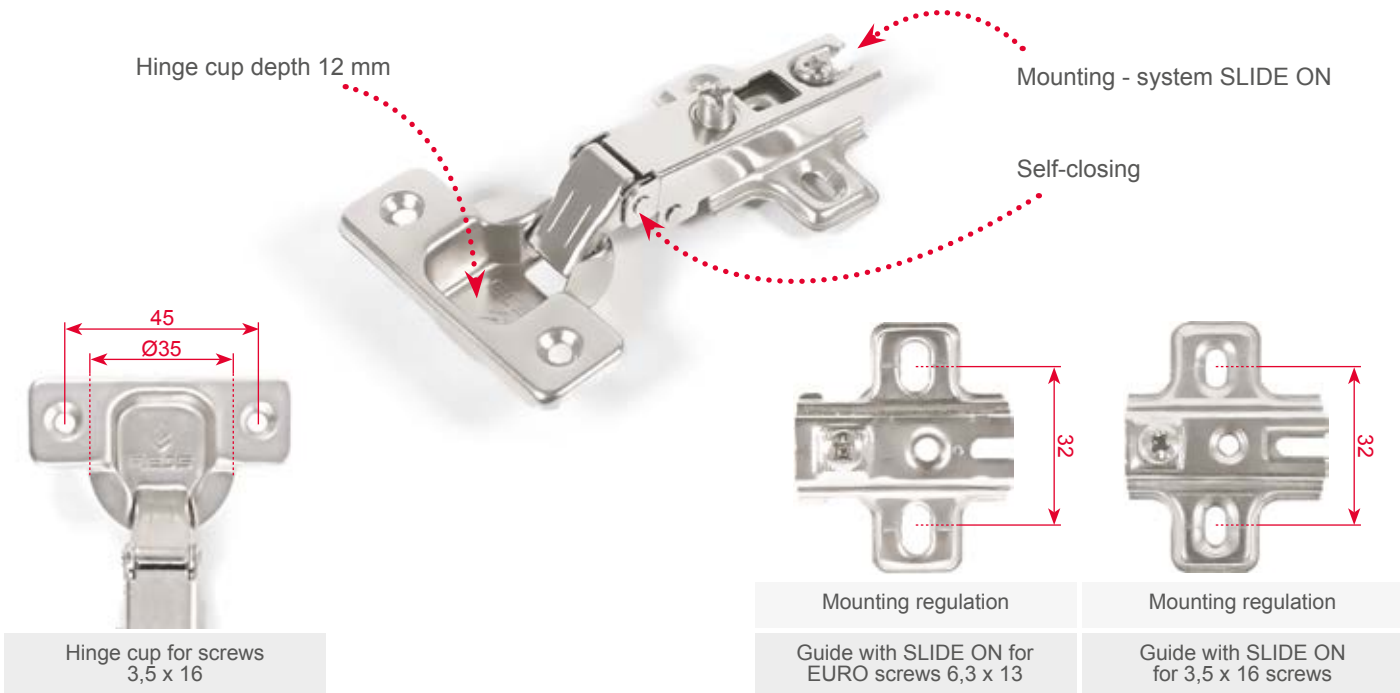

Packaging: Hinges packed in plastic bags, in pairs.

The number of hinges depends on the height and weight of the cabinet front. Stability ensures the greatest possible distance between the hinges. The data refers to cabinet fronts with a width of 600 mm.

Basic hinge

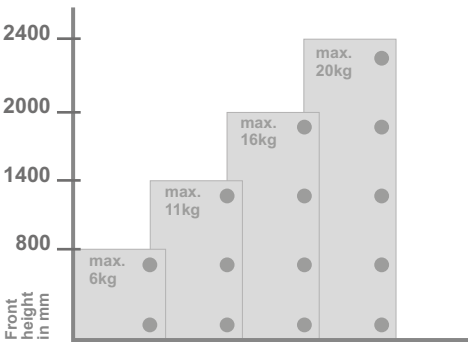

Classic hinges with cup 35. Combine reliable operation with classic design.

Mounting of the hinge-arm to the guide.

Hinge quantities

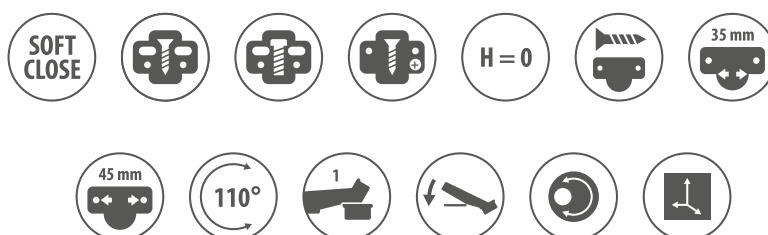

Packaging: hinges sold loose

! The number of hinges depends on the height and weight of the cabinet front. Stability ensures the greatest possible distance between the hinges. The data refers to cabinet fronts with a width of 600 mm.

### Flap lift EXALTO

- For narrow top-cabinets
- 6-stage power regulation
- simple assembly
- low opening resistance
- modern design
- flap and cabinet body fixings included
- combining with SOFT CLOSE hinges, ensures quiet and gentle closing

Recommended Hinges:

TJ01.7101.01.064 - EXPERT SOFT CLOSE full overlay hinge 110° crank 0 with mounting plate H=0

TJ01.7199.01.064 - EXPERT SOFT CLOSE full overlay hinge 110° crank 0 with mounting plate H=0 with excentric screw adjustment

type	index	colour
LF 500-1500	TJ09.0003.01	002
LF 800-1800	TJ09.0004.01	002

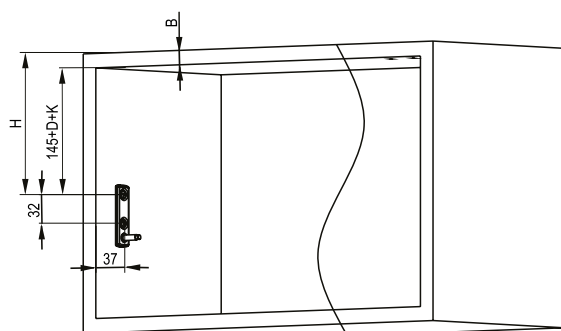

#### Calculation of the elevator power factor LF:

Corpus Height KH (mm) x weight of the cabinet front with double weight of the handle (kg).

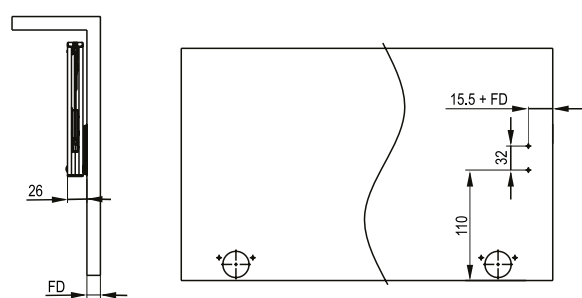

When on the boundary of the weight restriction for a single lift we recommend a test assembly!

#### Mounting Position

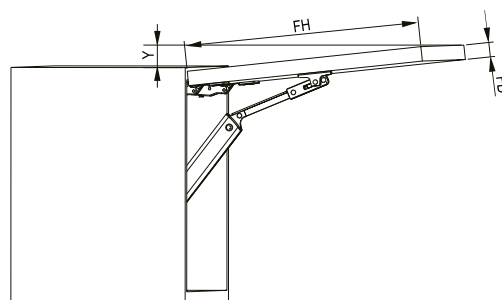

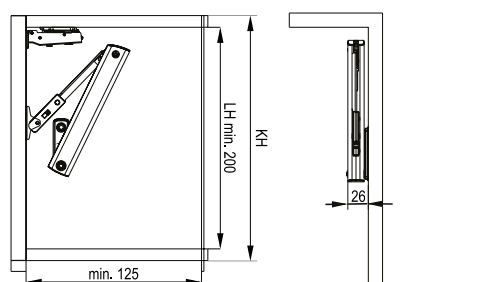

$$H = 145 + D + K + B$$

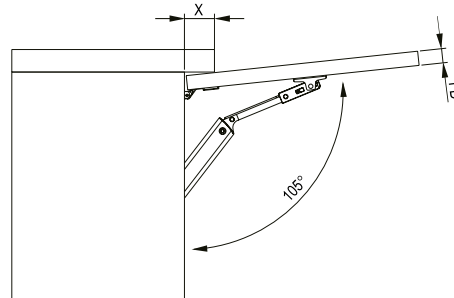

#### Front Mounting Position

#### Space required

# DECORATIVE ELEMENTS

aluminium frame | handles

## *Finishings of the highest level*

Beauty is in the details are. The right choice of decorative elements will give character to your kitchen. The upper cabinet fronts one of the most exposed elements not only of furniture, but also the entire interior. In the REJS offer, in addition to wood and board decors, it is worth paying attention to glass and aluminum profiles that are perfect for modern, state of the art interiors in a loft style and more. The handles also play an important role, they are not called the jewelery of furniture for nothing. Our offer includes a choice of classic, simple or modern handles, which will successfully suit any interior.

### *A wide range of decorative elements*

REJS's offer includes several types of aluminum profiles with various surface finishes. They are perfect for: classic fronts side-opening and tilted. More frequently, they are also used as drawer fronts - especially wide and tall ones. REJS offers a wide range of single-colored glass, satin, three-dimensional, as well as printed graphics, as a filling for fronts made of aluminum profiles,. A great help is the cut-to-measure service for any purpose.

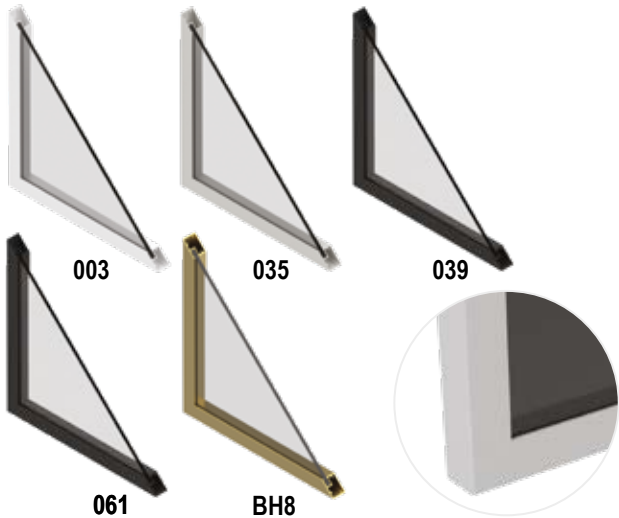

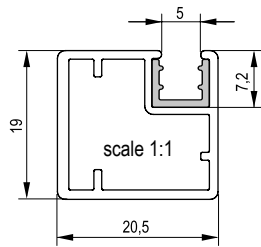

The REJS assortment also includes a wide range of furniture handles: railing, screw-on and edge in the most fashionable colors.
